PRODUCT DESCRIPTION

The AeroKit Responder 4 Series Plastic Tacklebox First Aid Kit is a comprehensive workplace standard first aid solution designed to support rapid response when incidents occur. Housed in a durable tacklebox style case, it keeps a broad selection of first aid items neatly organised so that essential supplies are easy to locate in stressful situations. The structured internal layout helps users quickly identify what they need, whether treating minor cuts or responding to more serious injuries until further help arrives.

This kit is designed around typical workplace hazards, from offices and warehouses to workshops and industrial sites. The rigid plastic tacklebox protects contents from dust and knocks, while the compact footprint makes it easy to carry between locations or store on a shelf, in a vehicle, or in a dedicated first aid station. Clear external identification supports quick recognition so responders can move straight to the kit without hesitation. With dimensions of 42 cm x 21 cm x 22 cm, it provides generous internal capacity without taking up excessive space.

The Responder 4 Series configuration supports workplace compliance by bringing key first aid items together in a single, ready-to-use solution. Dressings, bandages, swabs, tapes, gloves and other essentials are arranged so that multiple people can access the kit at once, which is especially useful in busy environments. The design suits shared spaces such as warehouses, construction sites, factories and large offices, while also being a strong option for home workshops, garages and outdoor activity bases where a higher level of preparedness is required.

Ideal for businesses looking to standardise first aid across multiple sites, this kit style fits seamlessly into workplace safety programs and can be easily checked during routine audits. The hard-wearing tacklebox withstands frequent handling, making it suitable for mobile workers, site vehicles and service teams who need supplies on hand. It also works well as a central kit in community venues, sports facilities and education settings where dependable first aid coverage is expected.

- **Workplace ready:** supports typical first aid needs across offices, warehouses and industrial sites.
- **Durable tacklebox case:** rigid plastic design helps protect contents from dust, bumps and daily handling.
- **Organised interior:** compartments and shelves assist fast product selection in emergencies.
- **Portable dimensions:** 42 cm x 21 cm x 22 cm size is easy to store in vehicles, cupboards or dedicated stations.
- **Ideal for shared spaces:** suited to workplaces, community venues, home workshops and general household first aid.

This tacklebox style case provides a rigid plastic outer shell that suits workplaces, vehicles and home workshops where a portable, impact resistant first aid kit is preferred.

Supplied as a single complete first aid kit in a 42 cm x 21 cm x 22 cm tacklebox case, this option offers generous capacity in a compact footprint that fits neatly in cupboards, vehicles or dedicated first aid stations.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.
