

ADDITIONAL INFORMATION

Weight	1.08 kg
Dimensions	32.5 × 32.5 × 37.5 cm
Carton Qty	12
Pricing Unit	Unit/1
Size	23L
Min Order Qty	1
UNSPSC Code	42192802
Tax Schedule	Taxable
Is Serialized Item	No
Is Dangerous Good	No

PRODUCT DESCRIPTION

AEROHAZARD Sharps Disposal Container is designed for dependable containment of used needles, syringes and other clinical sharps in professional, community and home care settings. A rigid polypropylene body with substantive wall thickness offers robust puncture resistance, helping protect users and surfaces from accidental injury. Its construction also supports leak resistance, so fluids remain contained during handling and interim storage between collections.

The lid assembly is engineered for secure closure. Waste is introduced through a guided entry, then the lid locks down to help prevent reopening and discourage access. This straightforward, one-way approach simplifies safe disposal at the point of care while supporting compliance in environments ranging from treatment rooms and vaccination hubs to outreach and mobile services.

The range is compatible with dedicated wire brackets and mobile trolleys, enabling flexible positioning to suit workflow and available space. Clear identification facilitates quick selection in multi-product environments, and the durable container structure withstands routine transport and handling demands. Built around the core requirements of strength, simplicity and value, it delivers reliable day-to-day performance for sharps management.

- **Puncture-resistant build:** rigid polypropylene walls help resist penetration from sharps.
- **Leak-resistant design:** secure closure helps contain fluids during handling.
- **Locking lid:** discourages access after disposal for safer interim storage.
- **Workflow ready:** compatible with wire brackets and trolleys for flexible placement.

The **Size: 23 L** option supports higher-volume sharps disposal in busy environments, offering extended capacity while maintaining the same puncture-resistant polypropylene body, guided entry and locking lid design for secure containment.

The 23 litre capacity suits high-volume sharps disposal points, providing extended use between changeovers while maintaining the same puncture-resistant polypropylene body, guided entry and locking lid design for secure interim storage of contaminated sharps.

AEROHAZARD SHARPS DISPOSAL CONTAINER 23L
