Kits - Case	Soft Pack
Is Dangerous Good	No

PRODUCT DESCRIPTION

The Modulator Red Burns Module is a dedicated burns-focused first aid pack designed to slot neatly into the wider Modulator first aid

system or to stand alone as a compact burns kit. Housed in a bright red soft case with clear burns iconography, it is easy to identify at a glance during an emergency, helping users quickly locate the right supplies when every second counts. The durable case features zip closure and ripstop-style fabric for added protection, making it suitable for workplaces, vehicles, community settings, and home use.

Inside, the module brings together a carefully selected mix of dressings and support items to help manage a wide range of minor to more serious burn incidents before professional care is available. Multiple AEROBURN burn gel sachets provide soothing cooling gel in single-use portions, ideal for immediate application to small areas of affected skin. Larger AEROBURN burn gel dressings are included for more extensive coverage, combining cooling gel with a soft, conforming dressing for secure placement over the burn site.

To support protection and coverage, the module includes several sizes of AEROBURN PE burn sheets. These polyethylene sheets are designed to cover and protect the area once active cooling has commenced, helping shield the site from contamination and contact. A conforming AEROFORM bandage allows secure fixation of dressings or burn sheets while maintaining flexibility around limbs and joints. A pair of AEROGLOVE nitrile examination gloves supports good hand hygiene during treatment, and an AEROGUIDE burns treatment card gives a quick-reference overview of key steps, reinforcing confidence under pressure.

The Red Burns Module fits seamlessly into any Modulator case, sitting alongside other colour-coded packs such as trauma, eye wound, cuts and grazes, dressings and bandages, and snake bite. Its distinctive colour and clear labelling make it simple to return to the case after use and just as easy to remove for replacement when restocking. The dedicated layout and product selection reduce the need to search through a large mixed kit, supporting fast decision-making and a more structured response to burns incidents in the workplace or at home.

- **Burns-specific focus:** curated contents dedicated to the initial care of burn injuries.
- **Easy identification:** bold red soft case with clear burns symbol for rapid recognition.
- **Organised response:** combination of gels, dressings, sheets, and bandage for flexible care.
- **Gloves included:** nitrile examination gloves support cleaner treatment.
- **Fits Modulator system:** integrates with colour-coded modules for workplace compliance.

This burns-focused module option is tailored to support rapid response to burn injuries, bringing together burn gels, dressings, protective sheets, a conforming bandage, gloves, and a treatment card in a single, easy-to-locate pack.

Supplied as a single soft pack module measuring approximately 20 cm wide, 6 cm deep, and 10 cm high, this unit offers a space-efficient burns solution that fits easily into Modulator cases, workplace cabinets, vehicle storage areas, and household cupboards.
