Is Serialized Item	No
Kits - People (High Risk)	10
Kits - People (Low Risk)	25
Kits - Treatments	Minor Wounds
Kits - Case	Soft Pack
Is Dangerous Good	No

PRODUCT DESCRIPTION

The AeroKit Modulator Green Cuts & Grazes Module is a dedicated first aid solution designed to manage everyday minor wounds

quickly and confidently. Housed in a compact soft case measuring 20 cm wide, 6 cm deep and 10 cm high, it fits easily into workplace first aid stations, vehicles, site bags or household cupboards while still providing an organised selection of wound care essentials. The bright green colour and clear front labelling help users recognise at a glance that this module is focused on cuts, scrapes and small lacerations, so the right items can be located without delay in a stressful moment.

Inside the module is a coordinated range of dressings, bandages and accessories chosen to support prompt first aid for minor bleeding and surface wounds. Plastic and premium fabric plasters in 72 mm x 19 mm sizes provide everyday coverage for small cuts and grazes. Non adherent dressings in 5 cm x 5 cm and 10 cm x 10 cm formats suit slightly larger injuries, helping protect the area while reducing the risk of the pad sticking to the wound. A conforming bandage offers secure fixation over dressings or for light compression, while microporous tape provides an alternative, skin friendly way to hold pads in place.

The module goes beyond basic plasters by including cleansing and antiseptic options to support good wound hygiene. Alcohol free cleansing wipes are provided to gently clean around the injury site, which is especially useful for children or sensitive skin. An antiseptic spray in a 50 mL bottle allows users to cover the area evenly before dressing, helping to prepare the skin in one simple step. Gauze swabs, nitrile examination gloves and a first aid leaflet support safer and more hygienic treatment, giving carers clear tools to look after family members, co workers or bystanders in homes, workplaces, schools and community settings.

To make day to day first aid more practical, the module also includes helpful accessories. Scissors and forceps allow for neat trimming of dressings and careful removal of splinters or small debris. Single use splinter probes and a bag of safety pins make it easier to deal with foreign objects and to secure bandages if required. A small notebook and pen are included to record details of the incident, which can be valuable in workplaces, childcare centres, sporting clubs or any environment where follow up or handover information is important.

The entire layout of the Modulator Green Cuts & Grazes Module is designed to save time and reduce confusion. Because it focuses specifically on one injury type, it works beautifully alongside other Modulator injury modules yet is also highly effective as a stand alone soft pack for home, travel, trades vehicles or small offices. The slim design sits neatly in drawers, backpacks and toolboxes, making it simple to keep quality wound care items close at hand wherever minor injuries are likely to occur.

- **Compact soft case:** 20 cm x 6 cm x 10 cm design for easy storage in homes, workplaces and vehicles.
- **Focused wound care:** tailored selection of dressings and plasters for everyday cuts and grazes.
- **Hygiene support:** antiseptic spray, cleansing wipes and gloves to assist cleaner wound management.
- **Practical accessories:** scissors, forceps, splinter probes and safety pins for precise first aid tasks.
- **Clear organisation:** injury specific module helps users quickly find what they need in an emergency.

This cuts and grazes module focuses specifically on minor bleeding and surface wounds, providing a clearly identifiable green soft case dedicated to everyday injuries so users can reach the right first aid items with minimal searching.

This module is supplied as a single softpack measuring approximately 20 x 6 x 10 cm, offering a compact footprint that fits Modulator cabinets, drawers and gloveboxes while still providing space for cut and graze first aid essentials needed in workplaces, vehicles and home setups.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.
