PRODUCT DESCRIPTION

The AeroKit Modulator Blue Eye Wound Module is a dedicated eye injury first aid kit designed to support rapid, confident care when

something goes wrong at work, at home, or on the move. Its focused layout groups key eye care items together so they can be found in seconds, helping users act quickly when dust, debris, splashes, or minor trauma affect the eye area. The compact soft case measures 20 cm wide, 6 cm deep, and 10 cm high, making it easy to keep in a workplace Modulator first aid kit, a site vehicle, a workshop shelf, or a household cupboard without taking up unnecessary space.

This module is built around the needs of eye wound management. It includes an AEROFORM conforming bandage to secure dressings, AEROPAD non-adherent eye pads to cushion and cover the eye area, and AEROTAPE microporous tape to hold pads gently in place. AEROWASH eye wash ampoules provide portable irrigating solution for rinsing the eye area, while AEROGLOVE nitrile examination gloves support hygienic handling during first aid. An AEROGUIDE eyewound treatment card offers structured guidance, helping users stay calm and organised when assisting an injured person.

The Modulator Blue Eye Wound Module forms part of the wider Modulator first aid system, which uses colour coded modules to make it easier to locate the right supplies for specific injuries. The blue design clearly signals its focus on eye wounds, so it can be reached quickly in busy industrial settings, hospitality venues, schools, and home workshops. Its soft, versatile case construction suits a wide range of environments, from fixed workplace cabinets through to portable kits for vehicles or outdoor activities.

Whether used as a replacement module within a larger Modulator kit or as a standalone eye wound pack, this module supports everyday readiness. It brings together the most commonly needed items for eye injuries into one organised solution that can travel wherever people work, learn, or play. The slim profile and zip opening make it simple to open on a bench, trolley, or desk so contents can be viewed at a glance and returned neatly after use.

- **Focused eye care:** dedicated selection of dressings, pads, wash ampoules, and guidance for eye wounds.
- **Compact soft case:** 20 x 6 x 10 cm design fits easily into workplace, vehicle, and home first aid setups.
- **Organised layout:** supports quick identification and access to items during an emergency.
- **Workplace ready:** aligns with the Modulator system for compliant, injury specific first aid coverage.
- **Versatile use:** suitable for workplaces, schools, vehicles, and household first aid preparedness.

This eye wound module comes in a soft, blue 20 x 6 x 10 cm case that's easy to spot and simple to store in workplace cabinets, vehicles, or home first-aid setups, making it quick to grab when eye injuries occur. It includes essential eye-care supplies like non-adherent eye pads, sodium chloride eyewash ampoules, a conforming bandage, microporous tape, nitrile gloves and an eye wound first-aid guide card for effective initial treatment.

Supplied as 1 soft eye wound module measuring 20 x 6 x 10 cm, this unit is slim enough for workplace cabinets, vehicles, or home cupboards while still providing organised space for essential eye care items.
