PRODUCT DESCRIPTION

The TraumaWear Large Sharp Laceration - Forearm is a forearm sleeve designed to bring realism to training scenarios without the need for intricate moulage. Whether you're a trainer or a role player, TraumaWear offers quick and easy application and removal of realistic wounds and injuries. Its silicone inner sleeve, while torn clothing and added fake blood create an authentic appearance.

Key Features:

- **Easy and Quick Application:** Simply pull on TraumaWear to apply realistic wounds with ease.
- **Realistic Enhancements:** Stage Blood or Fresh Scab can be applied to heighten the authenticity of the wounds.
- **Versatile Use:** Ideal for both trainers and role players, allowing repeated applications on manikins or individuals.
- **Comfortable Fit:** The forearm sleeve is designed for a comfortable and secure fit during training exercises.

Incorporate TraumaWear into your training sessions and elevate the level of realism, enabling a more immersive and effective learning experience. Remember, our goal is to enhance your training, and TraumaWear does just that. While it offers exceptional benefits, we also want to be transparent: TraumaWear is not meant for real medical use, but rather for training purposes only. Wash the sleeve with warm soapy water after each use to maintain hygiene.
