Is Dangerous Good	No

PRODUCT DESCRIPTION

The AeroKit Voyager 2 Series Softpack Versatile First Aid Kit is a compact, portable solution designed to support quick response to everyday injuries at home, in the car, or on the go. The softpack case measures approximately 10 x 8 x 13.5 cm, making it easy to store in a cupboard, glove box, backpack, desk drawer, or caravan without taking up unnecessary space. A robust handle and streamlined profile make it simple to grab in a hurry, while the bright colour and clear first aid markings help it stand out when needed.

This kit is assembled as a convenient collection of equipment and materials for the rapid, initial treatment of an injury. It supports care for common incidents such as minor cuts, grazes, burns, sprains, and other everyday mishaps that occur around the home, at work, or while travelling. The internal layout is organised to keep components visible and accessible, so it is easier to locate dressings, tapes, wipes, and other essentials when time matters.

The Voyager 2 Series Softpack Versatile First Aid Kit is well suited to personal and motorist use, especially for low to moderate risk environments. In the car it offers reassurance on road trips, school runs, and weekend getaways. Around the home it provides centralised coverage for family activities, DIY projects, and backyard recreation. It is also a practical choice for small offices, mobile workers, tradies, and community groups who need a dependable first aid kit that is simple to transport between locations.

The soft case construction is designed to tolerate regular handling while helping protect the contents from dust and everyday knocks. Internal pockets and sleeves assist with grouping similar items together, which helps maintain order as the kit is used and restocked. The compact footprint means the kit can be kept close at hand rather than stored out of reach, supporting faster response when an incident occurs. With its versatile design and balanced contents, this kit forms a solid foundation for general first aid preparedness across a wide range of settings.

- **Compact size:** 10 x 8 x 13.5 cm case fits easily in cars, homes, and workplaces.
- **Soft, portable design:** lightweight case with handle for convenient grab-and-go use.
- **Organised interior:** structured layout helps users quickly find key first aid items.
- **Versatile coverage:** supports initial treatment for common injuries in everyday environments.
- **Ideal for home and travel:** suitable for households, motorists, small workplaces, and outdoor activities.

This product is not a substitute for direct medical attention from a healthcare practitioner. Always read the label and follow the directions for use.
